EDUCATION

Johns Hopkins University

Master's in Computer Science.

Vidyavardhaka College of Engineering

Bachelor Of Engineering in Information Science and Engineering.

Baltimore, MD

August 2023 - May 2025

Karnataka, India

August 2017 - May 2021

TECHNICAL SKILLS

- **Programming & Scripting:** Python, Shell Scripting, SQL, C, C++, Java, C#.
- **Web & Application Development:** Node.js, React.js, Angular.js, Django, Express.js, Next.js, Vue.js, JavaScript, PHP, HTML5/CSS, Bootstrap, jQuery, REST API, GraphQL, WebSockets, Web3.js, Ethers.js.
- **Tools & Technologies:** Git, Docker, Jenkins, CI/CD, Postman, MySQL, MongoDB, TypeORM, AWS, CQRS, Microservices, WebSockets, Linux, Ubuntu, Ethereum, Solidity, Smart Contract Development, Web3.js, Hardhat, Infura, Alchemy, NFT development, Decentralized Finance (DeFi), GitHub, Jest, Mocha, Chai, TDD (Test-Driven Development), Event-Driven Systems, RESTful API Design.

WORK EXPERIENCE

CNOTES.IN - FOUNDER

BENGALURU JAN 2021 - PRESENT

A dynamic **CRM** for cable operators. Oversee all aspects from development to customer support, including bug fixes and feature enhancements. Streamlined customer management, billing, and collections, and provide real-time business analytics. Ensure high customer satisfaction through responsive support and continuous improvements.

Tech Stack : **PHP, HTML, CSS, JS, jQuery, MySQL, Argon CDN**

JKTECH : SOFTWARE DEVELOPER

BENGALURU MAY 2023 - JULY 2024

- **Engineered event-driven functions** with **Nest.js** for **PostgreSQL** updates and developed a system "**recreation**" feature, enhancing scalability and reliability by enabling rapid rebuilding and scaling.
- **Integrated Google Drive** by researching and applying the least **permissions** necessary, and created detailed documentation for future developers, resulting in a 60% increase in customer satisfaction and a 30% boost in sales.
- **Reduced support ticket** backlog by 80%, from 60+ to fewer than 10 tickets, resolving 20% of which were severe cases related to critical data issues

Tech Stack : **Angular, CQRS, Ts, jQuery, Postgres, Microservice Architecture, Event-driven Architecture .**

JUEGO STUDIOS : SOFTWARE DEVELOPER

BENGALURU AUG 2021 - APR 2023

- Developed online multiplayer games with **Node.js, Express.js, Socket.io**, and REST APIs. Emphasized user experience with inbuilt chat options and reconnection features.
- **NJS2-CHAT-TEXT Plugin:** Streamlined chat functionality and its integration within the njs2 framework, capable of managing multiple group chats and private 1-1 chats, including data storage and anonymity. Estimated to save at least 15 days of development time/project.
- Contributed to diverse projects, including Horse Betting (spree.bet), Multiplayer Poker (MCL Poker), educational games (Plastic Game), and Device Tracking Systems (Device Logger), showcasing **adaptability** and **versatility** in software development, with each project managed individually.

Tech Stack : **Express.js, Monolithic, Js, Nodejs, RestfulAPI's, Solidity.**

ACADEMIC PROJECTS

PATENT VERIFICATION SYSTEM WITH BLOCKCHAIN

JOHNS HOPKINS, DEC 2024

As the team **lead**, I spearheaded the development of a Patent Verification System built on **blockchain** technology. The system leverages **Next.js** for a robust, user-friendly frontend, and **smart contracts** to ensure secure and verifiable patent ownership.

CLUE CRAFTERS

JOHNS HOPKINS, MAY 2023

Created a 6-player multiplayer board game using **Next.js, Express, and WebSockets** for a software engineering class project. Focused on effective time management, communication with team members and stakeholders, and comprehensive documentation

HOBBIES AND EXTRACURRICULARS

Personal Interest: Painting, Philately, Numismatics.

Volunteering : Worked for an NGO (U&I) to teach orphaned/education deprived kids English, Maths and Science.
